EMVO_0122	2 3.0	19 JUN-17/DEC/2018	4 of 39

1. Purpose

The EMVS (European Medicines Verification System) requires that OBP's (On-Boarding Partners) upload both product master data and product ~~batch~~/pack data. The aim of this guide is to clarify what data is expected to be used for the EMVS master data noting that the long-term goal is to source directly from the IDMP/SPOR system.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN-17/DEC/2018	5 of 39

2. EMVS Master Data Requirements

These consist currently of two primary data collections.

- A common 'applies to all markets' collection of data and
- A market specific collection of data.

Master data elements are required by Article 33 of Eudralex DELEGATED REGULATION (EU) 2016/161 of 2 October 2015 [[Linked Here](#)] and the documents referred to therein. Master data should therefore be in line with regulatory submission and the law in force at the time. The data listed in the DR 2016/161 Article 33, Sections 2.c and 2.g are to be sourced, on a short-term basis, from the regulatory QRD data or SmPC ([summary of product characteristics](#)) information. The code listed in the DR 2016/161 Article 33, Section 2.e is to be sourced, from the Article 57(1) product database. Long-term all will be sourced from SPOR. This document is a guide and is not intended to be used as the 'authority'. Ultimately it is the sole responsibility of each OBP to ensure that their data submissions meet the requirements of the law.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	6 of 39

3. SPOR

The long-term aim for EMVS is to have the European Hub connected to the European Medicines Agency (EMA) SPOR data repository and to use this connection to provide a source of regulatory approved data that can be utilized by EMVS to provide a higher quality of data. An additional benefit is that it will allow each EMVS connected OBP to submit a lower payload of master data knowing that the bulk can be sourced from SPOR and will be populated automatically.

The key data fields that will enable this to function, for those parties who fall under the scope of SPOR, are:

- Product Code and Coding Scheme (in EMVS)
- Data Carrier Identifier (in SPOR) which is equivalent to the Product Code in EMVS.
- ISO Country Identifier for each market of intended sale

There will always be a requirement for each OBP to upload a partial set of master data to EMVS however, when SPOR is available, populated and connected, this overhead will reduce.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	7 of 39

~~3.1 Future Aims~~

To better facilitate the connection with SPOR, the underlying data model within EMVS ~~will be~~ ~~has been~~ modified ~~during 2018~~. The impact of this change on the OBP interface ~~will be~~ ~~was~~ minimal (zero) however there will be an enhancement required to the interface with each NMVS.

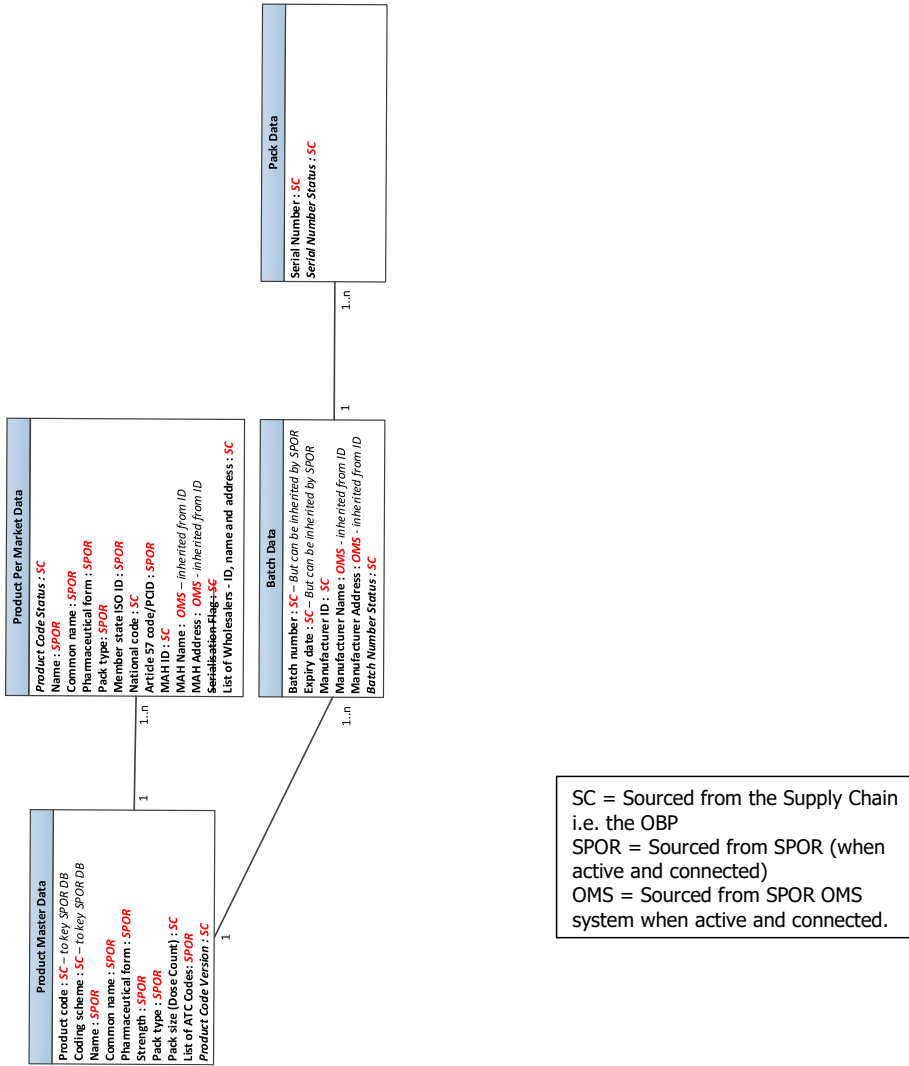

~~This intermediate scenario~~

~~This update (realised in Hub version 1.4)~~ provides the necessary data element 'placeholders' which will be populated when the connection with SPOR is established. The following is provided as ~~a~~ ~~working draft~~ ~~guidance~~ to provide ~~as more~~ ~~foresight~~ ~~insight~~ into the ~~intended~~ changes to the data model and to explain why the changes will occur and how they are able to better equip EMVS when SPOR is ready for connection.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN-17/DEC/2018	8 of 39

SC = Sourced from the Supply Chain
 i.e. the OBP
 SPOR = Sourced from SPOR (when
 active and connected)
 OMS = Sourced from SPOR OMS
 system when active and connected.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	9 of 39

The highlights of ~~this amendment~~ the data model changes are as follows:

- The Common Data Section has a new 'List of ATC Codes' added. Maximum number of codes per list is ten. ATC codes can be in the 5 character format or 7 character format and they apply to all markets for the given product code. ~~(The ATC Code cannot be updated or set directly by the OBP).~~
- The Product Code Status (which is not accessible by the OBP~~77~~) is moved to the Market Specific Data section to support the ~~forth-coming~~ 'Product Withdrawal' capability.
- The Market Specific Data section has been upgraded to included:
 - Name
 - Common Name
 - Pack Type
 - Pharmaceutical FormThis permits the future insertion from SPOR of the localised regulatory data for each market.
- The element 'Serialisation Flag' ~~will be has been~~ deprecated but left on the OBP interface. No logic is applicable to this element.

~~What we are aiming to achieve here is 'the best of both worlds'.~~ Currently SPOR is some way off being available to use in conjunction with EMVS and indeed, some OBP categories are not within the scope of SPOR.

Adding the Name, Common Name, Pack Type and Pharmaceutical Form to the Market Specific Data will allow localised regulatory approved data to be inserted and sent to each applicable market when SPOR is available.

Retaining the same data at the 'Common Data' level allows the existing OBP interface to remain consistent ~~with today~~ thus lowering the development risk for each OBP~~77~~.

Rules will be in place to ensure that these values are used appropriately and allow for SPOR to become the 'master source' when available.

ATC codes apply to all markets and thus have been added to the Common Data level and will be appended to the data sent to each market by the European Hub. This will be an updated interface ~~up~~ version and NMVS will need to be updated to make use of the new data. These elements will not be accessible by the OBP interface and will only be populated when SPOR is connected. The ATC code data is required to fulfil one of the NCA reporting requirements.

~~The proposed new data model will not be available until Hub V2-Rel 1.4 is made available mid-2018. To underline, the OBP interface and data requirements will not change and thus the remains of this document stand.~~

4. Common Master Data Elements

In the common master data elements section, we have the following elements that are addressable by the OBP interface and that will be the responsibility of each OBP to upload.

Added to the table below in the 'Element Name' column is the mapping to the EMVO Gateway file format naming conventions. These are shown thus: **[aaaaaaa]**, if shown as **[Not Accessible]**, this means that the OBP cannot set these values using the EMVO Gateway. Items shown in *italics* cannot be loaded directly by the OBP.

Formatted: Font color: Auto, Not Strikethrough

Element Name	Description	Example ¹	Reference Examples
Product Code [CodeValue]	The logistics code on the pack and contained within the new Data Matrix code. Will be either a <u>GTIN</u> , <u>NTIN</u> or <u>PPN</u> only.	0506014190001 5	Logistics / Supply Chain Mgmt.
Coding Scheme [CodingScheme]	Can only be either <u>GTIN</u> (where a GTIN or NTIN is used for the product code) or <u>PPN</u>	GTIN	Simple choice GTIN/PPN
<i>For the following 5 fields, please refer to the table in Appendix 1 for guidance or to the reference¹ below</i>			

¹ For additional examples on Name, Common Name, Pharmaceutical Form, and Strength refer to "[EMA splitting of the full presentation name of the medicinal product best practice](#)", EMA/327516/2014 Rev. 3, 19 January 2016

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN-17/DEC/2018	13 of 39

Element Name	Description	Example ¹	Reference Examples
Common Name [CommonName]	<p>International Non-proprietary name (INN) or the usual common name of the active substance(s), if part of the full name of the medicinal product.</p> <p><i>For single market packs, use the national language for NAP/MRP/DCP. English is acceptable for CP. If SmPCs are valid for a specific product in more than one language (Belgium), provide the commonnamecommon name from within one of the SmPCsSmPCs. For multi-market packs, use the common name as it appears on the artwork or a concatanationconcatenation of the common name in each language suitable for the pack. Longer term aim for multi-market packs will be to have the common name held in the market specific data not in the common data.</i></p>	<p>Amoxicillin</p> <p>Telmisartan/Hydrochlorothiazide</p>	<p>QRD, Annex 1, sec 1 (name element only) i.e. an extract from the 'Name of Medicinal Product'. This field is not validated against an external term.</p> <p>Note: this field may not always be present in regulatory submissions and therefore this field may legitimately be left empty in these circumstances.</p>
Pharmaceutical Form [FormType]	<p>The single full Standard Term of the European Pharmacopeia, using the plural form if appropriate (https://standardterms.edqm.eu/) – currently only the English terms are supported.</p> <p>For multi-component medicinal product use EDQM Combined Pharmaceutical Dose Form CV.</p> <p><i>More flexibility will be permitted in the future by moving this element to the market specific data and removing the "English Only" restriction.</i></p>	<p>Capsule</p>	<p>QRD, Annex 1, sec 3</p> <p>SPOR IDMP "Pharma Dose Form Name Part"</p>

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17 /DEC/2018	14 of 39

Element Name	Description	Example ¹	Reference Examples
Strength [Strength]	The pharmaceutical strength of the product. This should be consistent with the quantity stated in the quantitative composition and the posology. (Will be a repetition of what is entered as part of the full name)	500mg 80mg/25 mg	Strength element of the Medicinal Product name in SPOR (IDMP), QRD, Annex 1, sec 1
Pack Type [PackType]	Refers to the packaging that carries the safety features (serial number and ATD) i.e. the sales pack, using a single Standard Term of the European Pharmacopeia. <i>Currently only the English terms are supported. More flexibility will be permitted in the future by moving this element to the market specific data and removing the "English Only" restriction.</i>	Box, Bottle, Bag	EDQM 'Packaging' term list
Pack Size [PackSize]	<u>The number of re-packable doses in the pack.</u> Where the pack is not readily re-packable, the value should be set as '1'. e.g. a pack of tablets that can be readily re-packed* and therefore this value will represent the number of tablets in the pack. A powder or syrup cannot be readily re-packed and therefore, regardless of volume, the pack size will be set as '1'. Please refer to the table in Appendix 2 for examples. *if the pack could not be split, e.g. a 28 day supply of contraceptive, the value is 1	28	The pack size can be derived from QRD, Annex 1, sec 6.5 but this is often not the same as the re-packable dose.
<u>ATC Codes</u> [Not Accessible]	<u>List [0..10] of ATC code values in 5 or 7 character format.</u>	<u>ANNAANN</u>	

Table 1 - Common Master Data (Market Agnostic)

N.B. The Name, Common Name, Pack Type and Pharmaceutical Form entered by the OBP will be copied to the Market Specific Data level by the European Hub. When SPOR is connected, these values will be over-written by those obtained by SPOR.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	15 of 39

The internal data model also supports the inclusion of up to ten ATC codes per product master data entry. These cannot be entered directly by the OBP and will be extracted from SPOR when the connection is made. ~~As such they are not included in the table above.~~

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN-17/DEC/2018	16 of 39

5. Market Specific Master Data Elements

For each market within a multi-market pack the following table should be completed.

For single market packs only one completed table is required.

Element Name	Description	Example	Reference Examples
Member state ISO Code [Id]	Two letter country code from ISO 3166-1 alpha-2 defining the local sales market(s) for the product. One ISO code per market table.	DE	List of ISO Codes (Appendix 3)
National code [Nationalcode]	It is required to insert the national code if requested by the NMVO (see Appendix 4). If not, it is recommended to insert the code (when it exists), however it is left to the discretion of the OBP to decide.	1234567	Appendix 4
Article 57 code/PCID [Article57Code]	Article 57 code: xEVMPD EV Code which is assigned by EMA after successful transmission of MPD (Master Product Data) to xEVMPD. Packaged Medicinal Product Identifier (PCID): ISO IDMP/SPOR identifier if already existing. If multiple codecodes exists for the market, <u>only</u> select one <u>only</u> that matches the 'Name' and 'Common Name' supplied. For Switzerland and Parallel Distribution products, leave empty.	PRD115784	Key as assigned by EMA upon submission of a new record to EVMPD
<i>Name</i> [Not Accessible]	<i>See common section for the description (this element is not directly accessible by the OBP)</i>		
<i>Common Name</i> [Not Accessible]	<i>See common section for the description (this element is not directly accessible by the OBP)</i>		
<i>Pack Type</i> [Not Accessible]	<i>See common section for the description (this element is not directly accessible by the OBP)</i>		
<i>Pharmaceutical Form</i> [Not Accessible]	<i>See common section for the description (this element is not directly accessible by the OBP)</i>		
MAH ID [Under element group MAH = Id]	Use the IDMP/SPOR OMS Organisational ID when available for the marketing authorization holder. This field is optional. <u>Exception Germany:</u> For interim period keep IFA registration number until further notice. For CAP/MRP, this represents the MAH obtaining the license. For NAP, this will be the local MAH.	48101	

Formatted Table

Formatted Table

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN-17/DEC/2018	17 of 39

Element Name	Description	Example	Reference Examples
MAH Name [Under element group MAH = Name]	Registered name of the MAH responsible for the product in the market (stated in row 1). Only compulsory to enter when the MAH ID is not used.	World Class Medicines Limited	QRD, Annex 1, sec 7
MAH Address [Under element group MAH = Street1, Street2, City, PostCode and CountryCode]	Postal address for the MAH detailed above. Only compulsory to enter when the MAH ID is not used.	14 Harper Street, Lincoln, LN6 3PW, UK	QRD, Annex 1, sec 7
Serialisation Flag [N/A]	Fill in "True" Field will be deprecated and has no business function.	True	n/a
List of Wholesalers with ID, name and address [Under element group ContractedWholesalers = Id, Name, Street1, Street2, City, PostCode and CountryCode] See Appendix 5 for guidance	This will be a list organised as <ID> (if available) <Name> <Address>. The list should contain the details of each wholesaler (eqv.) who is contracted by, or on behalf of , the MAH detailed above (thus only pertinent to the stated local market) to handle the product represented by the product code in table 1 row 1. The ID is optional and reserved for future inclusion when Wholesalers are identified as meticulously as MFR'sMFR) and MAH's.	<u>ID=N/A</u> Name = 'Better Wholesaling GmbH' Address = 'Neue Strasse 12, 10119 Berlin, Germany'	n/a

Formatted: German (Germany)

Table 2 - Market Specific Master Data

For multi-market/shared-market packs, the above table 2 is repeated for each market the pack is destined to be sold. Note, that multi-market designation (i.e. multiple table 2) can be added in a stepwise manner as the EMVS system reach extends. Thus if only one of the markets for a specific product is connected and operating – only add the one table 2 for that market. When another of the markets comes on-line, amend the master data entry to add the new market table. Adding tables for markets that are not on-line will result in the master data submission being rejected.

N.B. the internal data model supports the elements 'Name', 'Common Name', 'Pack Type' and 'Form Type' at the market specific level. These cannot be entered directly

6. Submission Procedure

6.1 Single Market Products.

Complete and send to the European Hub, one of each Table 1 and Table 2 with the Table 2 Member state ISO Code set to the market required.

6.2 Multi-Market Products.

Complete and send to the European Hub, one of Table 1 and one of Table 2 for each market of intended sale (noting that a step-wisestepwise approach may be required during the ramp-up phase whilst all national systems are not fully operational-).

7. Batch and Pack Data

Master data is essentially a one-off or occasionally uploaded function however the uploading of batch and pack data is more frequent.

The Delegated Regulation has defined some extra data requirements for this more frequently used operation.

This more frequently uploaded data consists of two basic element groups.

- 1 The first defines the details of the batch being produced
- 2 The second defines the physical pack serial ID's associated with the batch.

The following tables define the data elements more completely.

7.1 Batch Data

Element Name	Description	Example
Batch number [BatchID]	Batch number as printed on the serialized pack	LOT123/XYZ3
Expiry date [BatchExpiry]	Expiry date of the serialized batch represented by six (6) numeric digits in the form YYMMDD Where the day element is not provided in the human-readable format, the value of DD can be set to 00 (e.g. 190200 is February 2019). Market/Company rules apply.	190209
Manufacturer ID [Under element group Manufacturer = Id]	Use the IDMP/SPOR OMS Organisational ID when available for the manufacturer organisation that placed the safety features. Use of this field is optional for now.	1234567

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17 /DEC/2018	21 of 39

Element Name	Description	Example
Manufacturer Name [Under element group Manufacturer = Name]	Enter here the full name of the manufacturer placing the safety features. Only compulsory to enter when the Manufacturer ID is not used.	Effective Medicines Limited.
Manufacturer Address [Under element group Manufacturer = Id, Name, Street1, Street2, City, PostCode and CountryCode]	Enter the Registered address of the manufacturer placing the safety features. Only compulsory to enter when the Manufacturer ID is not used.	12 Harper Street, Lincoln, LN6 3PW, UK
Batch Number Status [N/A]	Automatically maintained by the verification system so no requirement to upload.	N/A

7.2 Pack Data

Element Name	Description	Example
Serial ID [Under element group SerialIds = Id]	Up to twenty (20) alpha-numeric characters or single case (i.e. upper or lower case not both) according to the GS1 Specifications from table 7.11-1. Serial number should be randomised according to the Delegated Regulation requirement (Art 4(b)) and the pack coding guidelines. For clarity, serial ID's can be numeric only so long as they meet the given criteria.	ZT34012956345DL M
Serial ID Status [N/A accessed by update use case as either CurrentStatus or NewStatus]	Automatically maintained by the verification system so no requirement to upload.	N/A

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	22 of 39

Note: The pack serial ID status is set to 'Active' upon upload to the EMVS (European Hub). Future operations on the pack status require the invocation of dedicated use cases – the status cannot be declared at the point of upload and nor can pack status be changed by means of repeated pack data uploads. Some pack state manipulation use cases defined 'bulk' operations where many serial ID's for a given product batch can be changed in a single operation.

Appendix 1: Common Master Data Element References

Element Name	Directive 2001/83/EC „Medicinal Products for Human Use“	QRD Template Version 10	Guideline on SmPC ² Revision 2 (September 2009)	xEVPMD Data Element
Name of Medicinal Product	The name, which may be either an invented name not liable to confusion with the common name, or a common or scientific name accompanied by a trade mark or the name of the marketing authorisation holder.	Annex I, sec. 1 “Name of Medicinal Product”	The (invented) name should be followed by both the strength and the pharmaceutical form.	AP.13.1 productname
Common Name of Medicinal product	The international non-proprietary name recommended by the World Health Organization, or, if one does not exist, the usual common name.	Annex III A, sec. 1	Product INN (International Non-Proprietary Name) / Common Name	AP.13.3 productgenericname
Pharmaceutical Form	according to summary of product characteristics (SmPC)	Annex I, sec. 3 “Pharmaceutical Form”	The pharmaceutical form of a medicinal product should be described by a single full Standard Term of the European Pharmacopoeia using the plural form if appropriate (e.g. tablets) (see section 3).	Value will be consistent with the European Pharmacopoeia until Hub V1.4 2018 interface when AP.13.6 productform should be referenced.
Strength	The content of the active substances expressed quantitatively per dosage unit, per unit of volume or weight according to the dosage form.	Annex I, sec. 1 “Name of Medicinal Product”	The strength should be the relevant quantity for identification and use of the product and should be consistent with the quantity stated in the quantitative composition and in the posology.	AP.13.5 productstrength

Appendix 4: Guidance for entering National Code

The National Code must be entered for the following countries that require, and have specifically requested, that the EMVS is used to look up the National Code.

Austria (add the PZN for all product types i.e. Multi-Market and Single Market)

Germany (add the PZN ~~only~~ for all product types i.e. Multi-Market products and Single Market)

Spain (all product types) (format: 6 digits + 1 check digit without separator, example: 6068946)

UK (AMPP required for all product types)

Portugal (all product types) (format: 7 digits, all numeric)

The list has initially been derived from the "Efpia Coding Requirement Tracker" and NMVOs should send a request to EMVO to be added to the list in this appendix if they want to national code to be entered.

For other countries it is recommended to enter the National Code when it exists, however the decision rests with the OBP.

Appendix 5: Designated Wholesaler Definition/Guidance

1. A (pre-)wholesaler (wholesale distribution authorisation holder) who has been **Executive Summary**

'Designated Wholesalers' are wholesalers who are designated by the marketing authorisation holder, by means of a written contract, to store and distribute the products covered by his marketing authorisation on his behalf. Likewise, the parallel importer / parallel distributor may designate a wholesaler, by means of a written contract, to store and distribute on his behalf the products covered by the parallel import authorisations/parallel distribution notices respectively. Marketing authorization holders and parallel importers / parallel distributors are obliged to upload to the EMVS a list of 'Designated Wholesalers'. The following rules apply:

Entity	Description	To Be Listed as 'Designated Wholesaler'?
<u>Pre-wholesalers / 3PLs (3rd Party Logistics provider) / Distributors</u>	<u>Legal entity independent from MAHs that has been contracted for storage and distribution</u>	<u>Yes</u>
<u>Sales Affiliates</u>	<u>Representative of the MAH focusing on sales and controlled by the MAH or subject to control by the same legal entity as the MAH</u>	<u>No</u>
<u>Co-promoter</u>	<u>Representative of the MAH focusing on sales and NOT controlled by the MAH or subject to control by the same legal entity as the MAH</u>	<u>Yes</u>
<u>Co-marketer</u>	<u>Legal entity independent of the MAH that commercializes the product under a different trademark and holds an own marketing authorization</u>	<u>No</u>
<u>Transportation Company</u>	<u>Legal entity contracted to transport the products</u>	<u>No</u>
<u>Full-line Wholesaler</u>	<u>Legal entity NOT acting in pre-wholesale role as described above</u>	<u>No</u>

Legal Background

According to Commission Delegated Regulation (EU) 2016/161, Art. 20 (b), a wholesaler shall at least verify the authenticity of the unique identifier for medicinal products he receives from a wholesaler who is

- neither the manufacturer
- nor the wholesaler holding the marketing authorisation (MAH)

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	29 of 39

- nor a wholesaler who is designated by the marketing authorisation holder, by means of a written contract, to store and distribute the products covered by his marketing authorisation on his behalf.

When Consequently, wholesalers are NOT obliged to verify the product authenticity of the unique identifier for medicinal products they have received from a storage the manufacturer or the marketing authorization holder or a 'Designated Wholesaler'.

With the introduction of the 'Designated Wholesaler', DR 2016/161 takes a view on the physical material flow in the supply chain rather than the financial flow between supply chain partners. From the definition in Art. 20 (b) it becomes clear that a 'Designated Wholesaler' is

- neither the manufacturer
- nor the Marketing Authorization Holder (MAH)
- nor a full-line wholesaler who is not operating on behalf of the MAH.

According to DR 2016/161, Art. 33 (2) (h),

- the marketing authorisation holder or,
- in case of parallel imported or parallel distributed medicinal products bearing an equivalent unique identifier for the purposes of complying with Article 47a of Directive 2001/83/EC, the person responsible for placing those medicinal products on the market

is obliged to upload to the EMVS a list of 'Designated Wholesalers'

Scenario 1: List of 'Designated Wholesalers' according to text of DR 2016/161

Figure 1 outlines the different roles that DR 2016/161 envisages together with the verification obligations. For clarification, the Figure considers the financial flow in addition to the material flow:

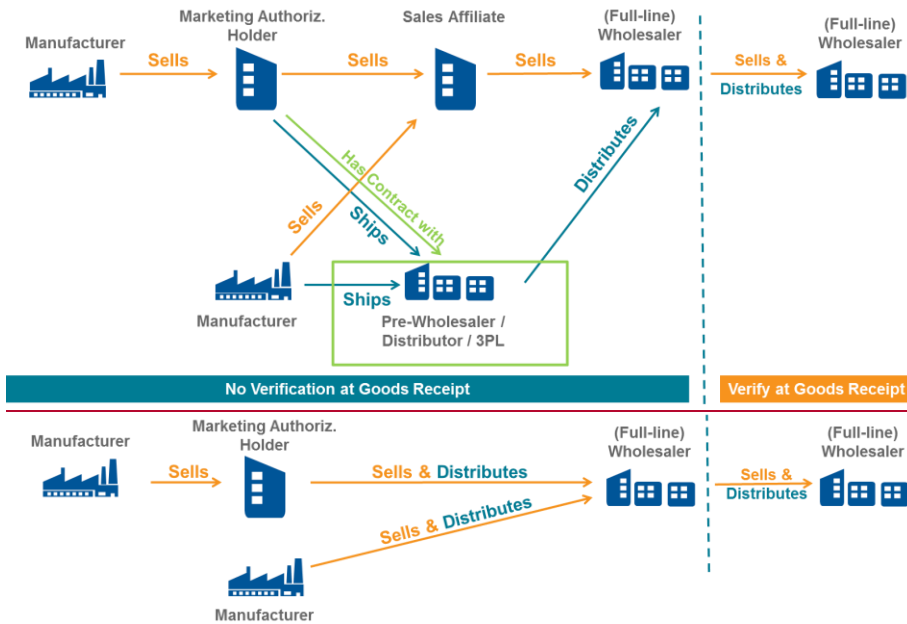

Figure 1: Supply chain setup as envisaged by Delegated Regulation DR 2016/161

Outsourcing of warehousing and distribution entity (e.g. 3 PL), or pre-wholesaler, (operations by the MAH requires that the outsourcing partner holds a wholesale distribution authorisation holder) who is authorization. Common terminology for the outsourcing partners is pre-wholesaler, distributor, or 3PL (3rd Party Logistics provider). If such outsourcing partners are designated by the marketing authorisation holder, by means of a written contract, to store and distribute the products covered by his marketing authorisation on his behalf, then such entity **SHALL BE listed as 'Designated Wholesalers'**.

- Formatted: List Paragraph, Indent: Left: 0 cm
- Formatted: Font color: Custom Color(RGB(69,69,69))
- Formatted: Font color: Custom Color(RGB(69,69,69))
- Formatted: Font color: Custom Color(RGB(69,69,69))
- Formatted: Font: Bold, Font color: Custom Color(RGB(69,69,69))
- Formatted: Font color: Custom Color(RGB(69,69,69))

The Marketing Authorization Holder, the Manufacturer, and any of the (full-line) wholesalers in the figure above **SHALL NOT BE listed** as 'Designated Wholesalers'.

Scenario 2:- Storage and Distribution Contract held by a Sales Affiliate

A **company's** sales affiliate of an MAH' means a company focussing on sales which is controlled by the MAH or which is subject to control by the same legal entity as the MAH. For purposes of EU pharma regulation, such sales affiliate and the MAH are considered to be one entity.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	31 of 39

It is a common scenario that the contract with the warehouse and distribution partner is not held by the MAH himself but by a sales affiliate. Such scenario is depicted in Figure 2:

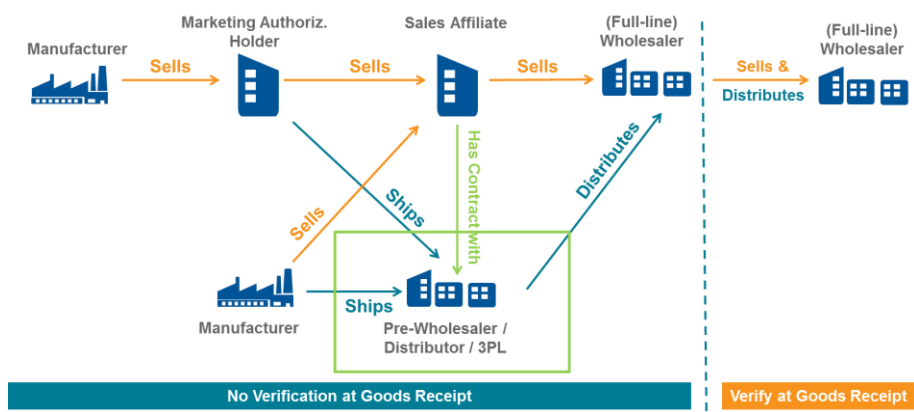

Figure 2: Supply chain setup where the contract for storage and distribution is held by a sales affiliate

Since the MAH and the sales affiliate are considered to be one entity, the sales affiliate **SHALL NOT BE** listed as 'Designated Wholesaler'. For all other parties depicted in the figure, the rules set forth in Scenario 1 apply.

Scenario 3: Storage and Distribution Involving Multiple Logistics Outsourcing Partners

Common supply chain designs involved more logistics partners than the one responsible for the distribution in the target country. Figure 3 outlines such example where the MAH or manufacturer ships its products to Country A where freight from different sites is consolidated. However, the affiliate in country A does not operate the warehouse himself but has outsourced activities to a 3PL. Products consolidated in the 3PL's warehouse are then shipped to the Pre-Wholesaler/Distributor/3PL in the target country B.

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN-17/DEC/2018	32 of 39

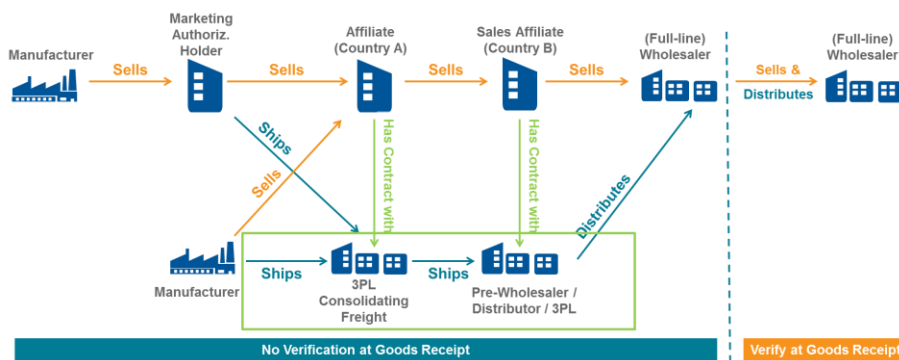

Figure 3: Supply chain setup that involves multiple outsourcing partners for logistics

Formatted: List Paragraph, Justified

In ~~licensee~~ such a scenario, the logistics partner in country B **SHALL BE** listed as 'Designated Wholesaler' to avoid that the first (full-line) wholesaler in the supply chain needs to verify the products upon goods receipt.

Furthermore, the 3PL in country A **SHALL BE** listed as 'Designated Wholesaler' to avoid that the 'Designated Wholesaler' in country B needs to verify the products upon goods receipt.

For all other parties depicted in the figure, the rules set forth in Scenario 1 apply.

Scenario 4: Commercialisation by a Co-Promoter

Co-promoters operate under an agreement with the MAH or manufacturer and/or a license to commercialise the same medicinal product under the same trademark. The related distribution scenario is depicted in Figure 4:

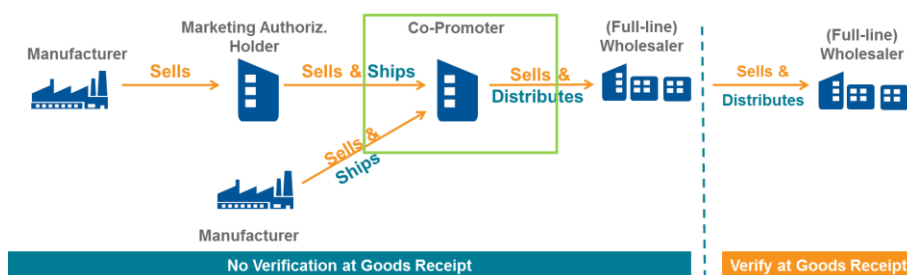

Figure 4: Supply chain setup where co-promoter has been contracted for commercialisation

By virtue of their co-promotion agreement the co-promoter has the right to market the medicinal product on behalf of the contract partner and/or licensor, including the right

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	33 of 39

to store and distribute the medicinal product. They **SHALL BE** listed as 'Designated Wholesalers'. For all other parties depicted in the figure, the rules set forth in Scenario 1 apply.

Scenario 5: Commercialisation by a Co-Marketer

Co-marketing is a common commercialisation arrangement between originator companies. A co-marketing agreement is generally understood as an agreement between two parties to commercialise a specific medical product by each party under a different trademark. As co-marketers commercialise the product under a different trademark, they have their own marketing authorisation, different from that of the MAH (e.g. a duplicate or an independent marketing authorisation). They are thus MAHs in their own right.

In a co-marketing arrangement, the co-marketer ~~and~~ holding his own marketing authorization has to fulfil himself the obligations for data upload according to DR 2016/161, Art. 33. This includes the list of 'Designated Wholesalers' that the co-marketer has chosen.

Formatted: Font: Not Bold, No underline

Scenario 6: Transportation Company

When a product is transported from location A to location B under a logistics contract and where for purposes of this transport the product is unloaded from an incoming semi-trailer truck or railroad car and loaded directly onto outbound trucks, trailers, or rail cars, with little or no storage in between, then the transportation company **SHALL NOT** be listed as 'Designated Wholesaler'.

Further Remarks and Recommendations

In practice, various supply chain designs beyond those outlined in the scenarios above exist. EMVO will not provide guidance on the proper determination of 'Designated Wholesalers' for any other scenarios. Marketing Authorization Holders (MAHs) and parallel distributors may wish to consider the following remarks when determining the appropriate list of 'Designated Wholesaler' for each country or product-country combination as well as documenting their decision:

- If an MAH has outsourced logistics operations to a 'Designated Wholesaler' operating a regional distribution centre, such 'Designated Wholesaler' **SHALL BE** listed for the products **IN EACH MARKET** he is distributing products to.
- The marketing authorization holder ~~of a~~ can designate a representative (commonly known as local representative) to represent him in a EU Member

Formatted: Font: Not Bold, No underline

EMVO: EMVS Master Data Guide

Document Number	Version	Effective Date	Page No
EMVO_0122	23.0	19 JUN 17/DEC/2018	34 of 39

State³. This includes rights for the representative such as to store and distribute the products.

- MAH's and parallel distributors should document in writing the delegation to sales affiliates or other legal representatives to appoint themselves 'Designated Wholesalers' for storage and distribution of the products covered by the MAH's marketing authorisation/s.

Best Practices

MAH's together with their Designated Wholesalers should collaborate with the MAH's wholesale ~~distribution authorisation~~ customers regarding proper maintenance of the 'Designated Wholesaler' information in the product master data to ensure smooth operations for wholesale customers at goods receipt. Co-promoters should also communicate with the respective MAH so that they are listed as Designated Wholesalers by the MAH.

Formatted: Font: Not Bold, No underline

In the interest of increased operational and supply chain efficiencies MAH's and their wholesale customers may also work together to explore ways of adapting/upgrading the shipping documentation (i.e. delivery notes/invoices) to provide clarity for the wholesale customers regarding the entities involved in the delivery e.g. MAH, designated ~~through a license/agreement with the MAH to place the product on the market~~ wholesaler, wholesale customer, delivery company etc. thus facilitating smooth operations at goods receipt.
